

Laminar Air Flow Safety Cabinets for Landspítali University Hospital of Iceland.

In preparation is an Invitation for tender for Laminar Air Flow Safety Cabinets for the Compounding unit at the Hospital Pharmacy in Landspítali University Hospital in Reykjavík Iceland.

The main products prepared at the Compounding unit are Cytotoxics and Total Parental Nutrition (TPN), with number of annual preparations around 13.000 and 8.000 respectively. The safety cabinets that are currently in use are old and not up to present safety standards. The intention is to renew the preparation cabinets for both the Cytotoxics preparation room (Cleanroom grade B) and the TPN preparation room (Cleanroom grade B). The new cabinets should offer the possibility to function with a compounding preparation software system in the future.

The cabinets should be compliant with GMP standards. Furthermore, the biological safety cabinet should be in accordance to EN12469 (Class II microbiological safety cabinet, European harmonized standard) and DIN12980 (“Safety Cabinets for Handling Cytotoxic Substances”, German standard).

The State Trading Centre of Iceland (Ríkiskaup) will announce and administer the process of the purchase.

Companies that produce and deliver such systems are with this announcement invited to inform on the technical specifications and state of the art of the **Laminar Air Flow Safety Cabinets** that are of interest for preparing for this investment.

Those interested should the latest of 12th of February 2015, send an application for participation in an introductory meeting to the e-mail kvald@landspitali.is marked:

“Laminar Air Flow Safety Cabinets – application for introduction meeting”.

Each company accepted will have approximately 1 hours for introduction and discussion. The introduction meetings are preferred to be scheduled before/after lunch time in week 10 in 2015. Suitable days in that week will be negotiated.

The purpose of these introductory meetings is to have information on the state of the art **Laminar Air Flow Safety Cabinets** delivered from the producers.
